Approx. area = 340k SqFt and 4.3 miles

**Mar. – Dec. 2019 Geopark**

**New Business Project Manager**

Definition of an asset evaluation strategy to recommend investments in the contracting process with ANH. Agree with functional managers and key people in the areas of: exploration, social, environmental, land, civil works, production and facilities, the asset evaluation process.

Ensure the full and timely evaluation of each possibility of investment in assets of the ANH's contract process (PPAA) and minor opportunities managed directly by the Colombia business unit.

Manage with the ANH, EPIS and other external stakeholders the requirements, tasks and deadlines to achieve the objectives.

**Sept 16 -Feb 19 Geopark**

**Supply Chain Manager**

**Colombia Business Unit. From Sept 2016 to Feb de 2019:**

Geopark stands out for its great flexibility to respond to the real conditions of operational needs (average early production facilities in less than 4 weeks), so traditional schemes are not feasible; planning should be considered for the foreseeable and the probable, in such a way that the restructuring of the supply chain was achieved, going from reactive to flexible planning where each category leader works with its users and manages to build demand scenarios, managing to meet operational needs that at the beginning of the management it had a daily transaction average of USD \$ 250k / day and that at the end of it was at the level of USD \$ 900k / day.

Fair relationships with suppliers were built, becoming one of the leaders in the O&G industry in the size of Goods and Services contracting with local and regional economies (more than USD \$ 33' for 2018).

Implementation of the Ariba Suite according to the maturity level of the organization.

**Brazil Business Unit. From Jul 2018 to Feb 2019:**

At the request of corporate compliance management, assumed supply leadership in Brazil to adjust and implement the supply model according to the size of the operation in the business unit in Brazil; while managing to meet the operational needs for operations in Blocks POT-747 and REC-128.

**Sept 14 – Sept 16 Geopark**

**Llanos 34 Asset Manager**

Comprehensive asset management working with functional managers considering the amazing growth and the important challenges of sustainability, technical and complex community stakeholder management.

Out of the box solutions became reality working with the chamber of commerce cluster strategy, co-financing projects with the local governments of important infrastructure projects that make feasible the operation of the asset for the long time; at the same time dealing with the internal challenge of accepting realities and impacts with their associated costs.

**Dec 12 – Sept 14 Geopark**
